

Commerce, I have seen the high-technology economy at work in other parts of the country and around the world. I have seen how connecting to the Internet makes a difference in the education of children. I have seen how connecting to the Internet makes a business prosper or fail. I have seen the promise of the broadband technologies, in effect high-speed Internet connects, to an economy are going to make the difference between whether some economies succeed or fail.

And I have lived in the State of Louisiana that I love dearly and yet I know suffers from a high illiteracy rate and a need for children to be uplifted, an economy that desperately needs a connect to this high-technology economy; and yet I see these numbers that say we are 47th, and I see so many other States lingering near the bottom of this list.

And so on next Monday we have convened what might be the last big high-technology summit conference of this millennium where on October 11 in Baton Rouge we are going to feature such speakers as:

Bill Kennard, the Chairman of the Federal Communications Commission,

Robert Pitofsky, the chairman of the Federal Trade Commission,

Barry Diller, the chairman and CEO of USA Networks,

Charlie Ergen, chairman of Echostar Satellite Communications,

Bob Coonrod, chairman of the Corporation for Public Broadcasting,

Greg Maffei, the Senior Vice President of Microsoft,

Afshin Mohebbi, the President and CEO of Quest Communications,

Mike McCurry, former White House spokesman, now a cochairman with our own Susan Molinari of the broadband Coalition, an organization formed to try to make sure every part of America, not just the few States that have high-technology connects, but every part of America is brought together; that we do not have a digital divide in the new economy of the future; along with folks like Hal Krisbergh, chairman and CEO of Worldgate Communications, a company that is manufacturing equipment that can put every child in this country on the Internet on television without the necessity of a computer for about \$5 a month rental, technologies that mean the difference between children being left behind, and businesses being left behind and economies being left behind or being a part of the new fast economy that is being described as the new economy of the new millennium.

This summit conference will be available to all of America on the Internet, and I want to tell you how you can log in, how you can tune in. If you are interested in knowing how critical it is for your homes and your businesses to be connected to the Internet and to be, more importantly, connected to the high-speed Internet of the future, the broadband services that are going to combine all the new economies on the

Internet with the high-speed visual and audio and data services that are going to be available on those services. If you are interested, you can tune in. It will be broadcast live on the Internet all day long next Monday, and you can find it at www.mobiletel.com.

That site is connected to other ISPs or Internet service providers.

You can tune in, you can get a sense of how your State can do what Louisiana, I hope, will do, and that is start a major effort to connect every family, every business to this new economy and to the high speed Internet. Join us at www.mobiletel.com on Monday all day at LSU and learn what the future looks like for your State.
